Tennessee End of Life Partnership (TELP) promotes high-quality, compassionate care for all who are seriously ill or nearing the end of life. Our goal is to transform healthcare so that medical care is aligned with individual patient preferences—that people get the care they need and no less, and the care they want and no more.

**Conference Goals:**

- Identify differences in Palliative and Hospice Care.
- Discover ways to integrate Palliative and Hospice Care into a facilities’ end-of-life care program.
- Develop methods to trigger conversations with patients and families on end-of-life care while avoiding any potential stigmas.
- Learn ways to promote early referrals to hospice and palliative care services that can benefit the patients resulting in improved quality of life.
- Recognize the federal regulations for Long Term Care facilities regarding Advanced Directives and understand the difference between State Rules and Regulations and Federal Rules and Regulations regarding Advance Directive and POST.
